^{4.} Only 65 returns were received by 30th September, 1951. The review of the Business made in this issue does not therefore include the particulars relating to them.

NEW BUSINESS

- 19. During the year 1950, there was an all round increase in the business of insurers as compared with that of 1949. New life insurance business registered an increase of 18% over that of 1949. Almost every company has shown an increase in sum assured and in the renewal premium income. This, however, cannot be attributed to the fact that people have become more insurance minded but is mainly due to the resumption of normal conditions after the post-partition repercussions.
- 20. The increase in net premium incomes in respect of Fire, Marine and Miscellaneous is also significant, the increase being about 17%, 23%, and 18% respectively over that for 1949. The claim ratios fell down by 19%, 13% and 6% in respect of Fire, Marine and Miscellaneous business as compared with those for 1949, which itself were lower than 1948 by 6%, 9% and 8% respectively. The decrease in the Fire claim ratios is most significant. It decreased from 39% in 1948 to 33% in 1949 and is 12% only in 1950. The commission ratios for all these classes of business have gone down appreciably but the ratio of the expenses of management shown increase over that of the previous year.
- 21. It is noticed that with the steady development of trade and industry and general all round improvement in the business conditions in the country, the general insurance business is also expanding.
- 22. The total assets in Pakistan on 31st December, 1950, of Non-Pakistan Insurers registered for insurance business in this country are given in the table below:—
