## PREFACE.

This volume is issued under the orders contained in the Punjab Government, Revenue Department, letter No. 2279-R., dated 14th June, 1928, the lines on which the revision of the District Gazetteers is to be undertaken are laid down in the Government of India, Home Department, letter No. 3375, dated 1st October, 1902, and are as follows :—

“ The chief difficulty which stands in the way of the periodical revision of the existing Gazetteers, and that reason which has caused so large a portion of their contents to become *obsolete*, is that they contain a mixture of permanent matter, such as that relating to the history, physical characteristics, religion, ethnography, etc., of the district of matter which changes gradually but, as a rule, slowly, such as that dealing with the agricultural and economic conditions ; and of ephemeral matter, mainly statistical, which soon becomes out of date. For this reason when a new district gazetteer is issued it should consist of two volumes, A and B, compiled on the following lines—

- “ (1) In the first addition all descriptive matter should go into the A volume ; but the volume should contain only such general figures (incorporated in the letter press) as are necessary to give point to remarks in the text . . . . . All detailed statistics should be relegated to the B volume, which would, at first, consist only of these and of such notes as may be necessary to elucidate them.
- “ (2) On the occasion of the next revision, the statistics in the B volume should be re-compiled, and this volume should be expanded by adding to it any matter that might be required to correct or supplement the A volume. Thus, if there had been a famine since A was published, if a new railway had been opened, and so forth, information on these points would appear in B as supplementary to the appropriate chapters in A.
- “ (3) This process would go on till the time had come for revising the A volume. Then all the supplementary text matter should be incorporated in the new A volume, and B would revert to its original form as a statistical appendix with explanatory notes.

" (4) A new addition of the B volume should be brought out after each census. The revision of the A volume must be left to the discretion of the local Governments. The occurrence of a new Settlement will ordinarily be the best time for such revision ;\* but it may well happen that plenty of copies of the original A volume are still available, and that the Settlement and lapse of time have not wrought any important change in the conditions of the district. In that case the revision of A should stand over till the stock of it no longer suffices for the demand but a brief account of the Settlement operations and of the changes which they have produced or disclosed in the state of affairs described in the A volume, should be prepared by the Settlement Officer before he is relieved of his duties for inclusion in the next decennial B volume.

" (5) The statistical part of the B volume should be issued with interleaved blank pages, so that those who use it can have the figures of later years written in. The tables included in the B volume should be drawn up on uniform lines, and should contain the main administrative statistics of the district and its tahsils or other sub-divisions. . . . It is thought that including the explanatory notes they should not ordinarily exceed a maximum limit of 50 pages."

Instead of issuing the tables with interleaved blank pages as suggested in paragraph (5) above, it has been found convenient to print the tables themselves with blank spaces in which to insert the figures of future years. The pages occupied by the statistical matter thus include the space in which the original scheme would have been appropriated by the interleaved pages, and consequently are somewhat in excess of the maximum fixed in paragraph (5).

---

\* In the Punjab the Settlement Officer is generally entrusted with the revision of the district gazetteer. This plan is commended for adoption in other provinces.

IMPORTANT EVENTS AS REQUIRED BY PARAGRAPH 4 (2) OF PUNJAB GOVERNMENT LETTER NO. 670, DATED 8TH MAY, 1903.

MANDI HYDRO-ELECTRIC SCHEME.

The Mandi Hydro-Electric Scheme popularly known as Uhl River Project has been built by the Punjab Government in accordance with the agreement, dated 3rd March, 1925, entered into between Captain His Highness Raja Sir Jogindar Sen Bahadur, K.C.S.I., Ruler of the Mandi State and the Secretary of State for India in Council and amended subsequently. The land required for the permanent possession of the project is leased by His Highness the Raja of Mandi for 99 years. The construction started in February of 1926 A. D. and the opening ceremony was performed at Shalamar (Lahore) on 10th March, 1933, by His Excellency Lord Willingdon, Viceroy and Governor General of India. The Head Works are situated at Brot on the bank of Uhl River, a tributary of the Beas River which joins the former at five miles from Mandi on the Mandi-Kulu Road. The Power House is built at Jogindar Nagar which is 35 miles from Mandi Town. The distance between the Head Works and the Power House is about nine miles and is reached by Haulage-ways and Tramways. In accordance with one of the provisions of the agreement, the Hydro-Electric Department delivers free of charge up to 250 kilowatts of Electric Power at Mandi Town by means of a 22Kv. transmission line constructed at their own expense. "The agreement also provides for the payment of Royalty and the supply of further power to the State as the scheme develops". The transmission line and the switch house at Mandi Town are maintained by the said Department. The Power House has a capacity for generating 157,680,000 units per annum at 50 per cent. load factor. The energy is derived from the Uhl River which, at the intake, is about 6,000 feet above sea level and the water is led by means of a pressure tunnel nearly three miles long through a spur of the Dhauladhar range to Tunnel exit from where it drops 1,800 feet to drive the generating plant at Jogindar Nagar. From the Jogindar Nagar generating station the energy at present is transmitted over 224 miles at 132,000 volts, 149 miles at 66,000 volts, and 35 miles, at 33,000 volts, covering a large portion of Eastern and Central Punjab.

The Kangra Valley Railway, a narrow gauge line, runs 10.793 miles in Mandi State. It covers an area of 150.573 acres, specified and definite rights in which have been acquired by the North-Western Railway on payment of compensation assessed

by the Mandi Darbar, jurisdiction over the area having been ceded by the Darbar to the British Government. The annual land revenue of the area was Rs. 359-8-0 (Land revenue Rs. 306-15-0; cesses Rs. 49-1-0; water mill Rs. 3-8-0). As Rs. 6,471 has been paid on account of the capitalised value of the land revenue, no land revenue was realised. There are two Railway Stations in Mandi State Territory, viz., Abju and Jogindar Nagar. The Railway was built to facilitate the construction of Hydro-Electric Works and also for providing easy means of access to the Kangra and Kulu districts and to bring Dalhousie and Dharamsala within easy reach of the Railway. The construction commenced in 1926 and the traffic was opened on 1st April, 1929. The goods traffic was, however opened on 1st December, 1928.
